Office Action Summary	Application No. 10/797,661	Applicant(s) HIRUMA, KEI	
	Examiner Andrew Schechter	Art Unit 2871	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15 and 25, drawn to a film forming method or device for discharging liquid droplets, classified in class 349, subclass 124.
 - II. Claims 16-24 and 26, drawn to a liquid crystal arrangement method or device for discharging liquid crystal, classified in class 349, subclass 189.
2. Note that claim 14 should depend on claim 9 rather than on claim 1.
3. The examiner interprets claim 25 as requiring the alignment film formed by an ink jet process, but the liquid crystal may be coated in any manner (in the phrase "on which the alignment film is formed by the ink jet process" the ink jet process refers to the alignment film). Similarly, the examiner interprets claim 26 as requiring the color filter and liquid crystal formed by an ink jet process, but the alignment film may be formed in any manner (in the phrase "on which the color filter is formed by the ink jet process" the ink jet process refers to the color filter). If this is not the intent of the applicant, then the claim language should be clarified, and it could have an effect on the above restriction requirement.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such

as a technique of forming a liquid crystal film in an LCD with spun-on alignment layers.

See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Schechter whose telephone number is (571) 272-2302. The examiner can normally be reached on Monday - Friday, 9:00 - 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on (571) 272-2293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
